

HMP60-L

Temperature and Relative Humidity Probe

Accurate, Rugged

Ideal for long-term, unattended applications

Overview

The HMP60, manufactured by Vaisala, probe measures air temperature for the range of -40° to +60°C, and relative humidity for the range of 0 to 100% RH. It uses the INTERCAP®

capacitive RH chip. This field-replaceable chip eliminates the downtime typically required for the recalibration process.

Benefits and Features

- › Field-replaceable humidity chip eliminates recalibration downtime
- › Compatible with most Campbell Scientific dataloggers
- › Can be mounted to a tower/tripod mast or crossarm
- › Compatible with the CWS900-series interfaces, allowing it to be used in a wireless sensor network
